Nairobi, Kenya.

COVER LETTER

Spend 10 minutes with me and you'll realize Aviation and Engineering are in my blood.

I am adept in product design, testing procedures, and manufacturing optimization. Moreover, while I may not have years of experience I excel at:

- **Conceptualizing future product and aircraft designs.**
- Drafting reports and presenting findings.
- **Conducting experimental and operational product tests.**
- Developing risk assessment and mitigation plans.
- Research and development

I am an individual that relishes problem solving; I have a passion for Engineering that goes beyond words. To be a good engineer your mental ability & attitude is your most important asset followed by having analytical skills to solve problems and being a high-level thinker.

I have one important quality which I think is vital for this process to be a successful one. I am trainable. I believe having the willingness and eagerness to learn isn't enough one needs to be able learn and understand new concepts, ideas and put them into practice.

Growing up as a boy scout I would say helped shaped me as an Individual and taught me proper **discipline, respect** & how to work in a team.

I would welcome the opportunity to contribute to your product development and optimization goals. I believe innovation calls for engineers who have their feet firmly planted in the practical world. **"Thinking outside the box isn't enough; one needs to think what they can do with the box".**

Yours Sincerely,
Anthony Muraya.

About me

If you're looking for someone to just follow orders and doesn't like to rock the boat, I'm probably not the right candidate. But if you need someone who can dig in to data and see what's working (and what's not), you've met the right person

WORK Experience

Intern Engineer / 6 Months – 2010 – Johannesburg South Africa

Springbok Aviation Services AMO – Daily work included light maintenance on Cessna aircraft such as c-172. Time was also spent on the DC 3 attending to troubleshooting landing gear issues.

Project Assistant / 2yrs 2009 – 2010- Johannesburg South Africa

Kensa Mission Agency: NGO - Managing projects on the ground.

Project Assistant / 1 ½ yrs. Jan 2015 – June 2016 - Nairobi Kenya

CFSK IT NGO - proposal writing, Ict project development, project implementation.

EDUCATION

Bachelor of Engineering in Aeronautics / 2nd Upper class honours Nov 2014

University of Hertfordshire

OTHER

Emergency Medical Technician - I intermediate

Avenue Rescue College – EMT- I is a professional course that is the highest level in Kenya for pre-hospital care therefore referred to as a 'PARAMEDIC'.

PROFESSIONAL Skills

- Managing People.
- Emergency Care.
- Ability to focus in tense situations.

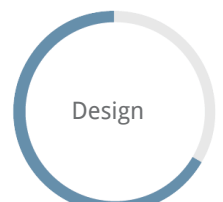

INTERESTS

- Rock Climbing
- Swimming.
- Camping.
- Reading Nonfiction.
